Selling your excess power back into grid

In February 2009, Energy Minister Eamon Ryan announced that farmers and householders can sell back surplus electricity back into the national grid. Eligible customers include micro- generation wind installations, Photovoltaics & Hydro installations.

First 4000 customers will get 19cent/KWH for every surplus unit generated for the first 3000 units surplus, after 3000 units surplus 9cent/KWH will be received for every surplus unit sold.

Breakdown of 19 cent:

ESB Customers only:	9	Cents
<u>Government Tarriff:</u>	<u>10</u>	<u>Cents</u>
Total Tariff received:	19	Cents

Before an installation has started, the ESB must be informed that a Micro-Generation installation is planned. To inform ESB Networks simply log on to

- 1) www.esb.ie/esbnetworks/generator_connections/micro_gen_connections.jsp
- 2) Download a NC6 form and fill out and send back to address indicated on form
