# Water Powered ATOMIC CLOCK Alarm/Thermometer/Calendar

The H2O Atomic Clock uses the latest long life H2O technology to power this radio controlled multifunctional clock

Simply add water to the cell to activate, and enjoy free energy to run your clock.

The clock will automatically pick up the time signal every day, so the clock always displays the most accurate time available on planet earth.

Integrated into the Atomic clock are an alarm, thermometer and calendar making the H2O Atomic Clock a real multifunctional device.
