

Product Name: Solar Mate II

Part Number: SM1002

Brief Description: Solar Mate is a lighting kit in a box! Where mains quality lighting is needed in remote locations, such as workshops, stables, summer houses, garden offices, garages, sheds etc Solar Mate is the answer.

Catalogue Description: Solar Mate addresses the problem of illuminating remote areas where no mains power exists. Exempt from Part P of the Building regulations, Solar Mate can be easily and safely installed by anyone. Solar Mate's solar panel will collect enough energy during the course of the day (even in Britain) to power its bulb for between 5 and 7 hours every day of the year (5 hours in the winter – 7 hours for the rest for the year). Solar Mate has a 10 year warranty so will easily pay back its investment many times. Solar Mate II will illuminate 32square metres.

Technical Description:

- Supplied with a 10watt crystalline solar panel, roof / wall fixing kit, 2 x 12volt energy saving bulbs, 2 x ceiling / wall bulb holders, wall switch, 7m cable, connectors, fuses and detailed instructions
